Subject Index of Volume 68

Acetic acid
  synthesis of, from methyl formate catalysed by Ni complexes, 277
Activation
  metal-catalysed reactions of triethyl phosphonoacetate and β-ketophosphonates with electrophilically activated nitriles, L1
Adsorption
  of O_2 and NO on CrO_x/ZrO_2 catalysts, as investigated by IR and ESR spectroscopies, 53
  structures and mechanisms of hydrogen/deuterium exchange reactions of alcohols over oxidic catalysts, 33
Alcohols
  adsorption structures and mechanism of hydrogen/deuterium exchange reactions of, over oxidic catalysts, 33
  2-(*N*-amido)-4-nitrophenol: new ligand for Cu-mediated hydroxylation of aromatics by trimethylamine *N*-oxide, L13
  catalytic amination of octanol in gaseous phase: action of uranyl ion on catalytic activity of Y faujasite, 187
  dehydrogenation of benzyl alcohol on ZSM-5 zeolites, 295
  hydroxylation of phenol over TS-1: surface and solvent effects, 45
  NADP-dependent alcohol dehydrogenase in *Methylosinus trichosporium* (OB3b), 255
  quantum chemical interpretation of mechanism of ethanol dehydrogenation driven by active oxygen bridges in silicalite-1 and silica, 73
  regeneration of NADH and hydrogenation of dihydroxyacetone by hydrogen with combination of hydrogenase and glycerol dehydrogenase, L21
Alkanes
  halogen-promoted γ-alumina: catalytic dehydrochlorination of 1,1,1-trichloroethane at room temperature on chlorinated γ-alumina, 347
  hydroformylation and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7
  kinetic study of [Ru(SALOPH)Cl_2] complex-catalysed oxidative carbonylation of methylamine to give methylurethane, 261
  Ni-catalysed ring-opening reactions of alkyl-substituted cyclopropanes; role of unreduced Ni species, 237
  Ru catalysts: reactions of cyclopropane and of ethane with hydrogen on Ru/titania catalyst; reaction mechanisms, 243
Alkenes, Olefins
  catalytic dimerization of ethylene to 1-butene by square-planar Ni complexes, 23
  catalytic oxidative dehydrogenation of cyclohexene, 1
  hydroformylation and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7
  IR study, *in situ*, of ethylene hydroformylation and CO hydrogenation on Ru/SiO_2 and sulphided Ru/SiO_2, 313
  linear dimerization of conjugated dienes: chemo, regio and enantioselective reaction catalysed by Ni complexes, 159
  tungsten carbonyl complexes as olefin metathesis catalysts, 177
Aluminium
  halogen-promoted γ-alumina: catalytic dehydrochlorination of 1,1,1-trichloroethane at room temperature on chlorinated γ-alumina, 347
  non-empirical calculations for interaction of dihydrogen with hydride and

alkyl complexes of B, Al and Ti, 149
particle size effect on kinetics of *p*-chloronitrobenzene hydrogenation over Pt/alumina catalysts, 331
Amination
catalytic, of octanol in gaseous phase: action of uranyl ion on catalytic activity of Y faujasite, 187
Amine
2-(*N*-amido)-4-nitrophenol: new ligand for Cu-mediated hydroxylation of aromatics by trimethylamine *N*-oxide, L13
kinetic study of [Ru(SALOPH)Cl_2] complex-catalysed oxidative carbonylation of methylamine to give methylurethane, 261
Amino acid
catalytic effect on transamination reaction between pyridoxal 5′-phosphate and L-serine, 105
Aromatic compounds
2-(*N*-amido)-4-nitrophenol: new ligand for Cu-mediated hydroxylation of aromatics by trimethylamine *N*-oxide, L13
amino acid catalytic effect on transamination reaction between pyridoxal 5′-phosphate and L-serine, 105
enantioselective hydrogenation of α-ketoesters with cinchona-modified Pt catalysts: effect of acidic and basic solvents and additives, 215
homogeneous catalytic carbonylation of nitroaromatics: discovery and *in situ* high pressure FTIR spectral studies of a novel binuclear Ru catalyst, 289
hydroformylation and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7
hydroxylation of phenol over TS-1: surface and solvent effects, 45
oxygen transfer processes to sulphides and sulphoxides mediated by cetylpyridinium tetrakis(diperoxomolybdo)phosphate, 269
particle size effect on kinetics of *p*-chloronitrobenzene hydrogenation over Pt/alumina catalysts, 331
Schiff bases of pyridoxal 5′-phosphate and polypeptides containing L-lysine: kinetic study, 379

Boron
borosilicate synthesis in non-aqueous solvent and its activity for n-icosane cracking, 301
non-empirical calculations for interaction of dihydrogen with hydride and alkyl complexes of B, Al and Ti, 149

Carbonyl
tungsten carbonyl complexes as olefin metathesis catalysts, 177
Carbonylation
homogeneous catalytic, of nitroaromatics: discovery and *in situ* high pressure FTIR spectral studies of a novel binuclear Ru catalyst, 289
[Ru(SALOPH)Cl_2] complex-catalysed oxidative, of methylamine to give methylurethane; kinetic study of, 261
Chromium
adsorption of O_2 and NO on CrO_x/ZrO_2 catalysts, as investigated by IR and ESR spectroscopies, 53
Clay-catalysed Diels–Alder reactions
role of solvent in, L31
Clusters
charge sensitivities of catalytic: model (n-Ni) and (n-Ni)–CO systems, 123
finite supercluster model of vanadium oxide catalysts, 223
CO
charge sensitivities of catalytic clusters: model (n-Ni) and (n-Ni)–CO systems, 123
IR study, *in situ*, of ethylene hydroformylation and CO hydrogenation on Ru/SiO_2 and sulphided Ru/SiO_2, 313
Cobalt
hydroformylation and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7

Copper
2-(*N*-amido)-4-nitrophenol: new ligand for Cu-mediated hydroxylation of aromatics by trimethylamine *N*-oxide, L13
Cracking
n-icosane; borosilicate synthesis in non-aqueous solvent and its activity for, 301

Decomposition
catalytic, of N_2O on $LnSrFeO_4$ (Ln = La, Pr, Nd, Sm and Gd), 199
Dehydrochlorination
catalytic, of 1,1,1-trichloroethane at room temperature on chlorinated γ-alumina; halogen-promoted γ-alumina, 347
Dehydrogenase
NADP-dependent alcohol, in *Methylosinus trichosporium* (OB3b), 255
Dehydrogenation
of benzyl alcohol on ZSM-5 zeolites, 295
catalytic oxidative, of cyclohexene, 1
ethanol; quantum chemical interpretation of mechanism of, driven by active oxygen bridges in silicalite-1 and silica, 73
Diamond
and graphite; influence of Zr ions on properties of Pd supported on, 355
Diels–Alder reactions
clay-catalysed; role of solvent in, L31
Dimer formation
selective head-to-tail, from acrylonitrile catalysed by phosphine-added Ni(0) complexes, L5
Dimerization
catalytic, of ethylene to 1-butene by square-planar Ni complexes, 23
linear, of conjugated dienes: chemo, regio and enantioselective reaction catalysed by Ni complexes, 159
Dispersion
and hydrodesulphurization activity; effect of Mo precursor on, of carbon-supported sulphide catalysts, L25

Epimerization
molybdate-catalysed, of D-glucose and D-mannose in aqueous solutions; kinetics of, 87

Ester
chiral sulphonated phosphines: catalytic transfer-hydrogenation of unsaturated substrates with formates in presence of water soluble complexes of Rh, L9
enantioselective hydrogenation of α-ketoesters with cinchona-modified Pt catalysts: effect of acidic and basic solvents and additives, 215
metal-catalysed reactions of triethyl phosphonoacetate and β-ketophosphonates with electrophilically activated nitriles, L1
synthesis of acetic acid from methyl formate catalysed by Ni complexes, 277

Glucose
D-, and D-mannose; kinetics of molybdate-catalysed epimerization of, in aqueous solutions, 87
Glycerol dehydrogenase
and hydrogenase; regeneration of NADH and hydrogenation of dihydroxyacetone by hydrogen with combination of, L21
Graphite
and diamond; influence of Zr ions on properties of Pd supported on, 355

Halogen
-promoted γ-alumina: catalytic dehydrochlorination of 1,1,1-trichloroethane at room temperature on chlorinated γ-alumina, 347
Hydrocarbonylation
and hydroformylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7
Hydrodesulphurization activity
and dispersion; effect of Mo precursor on, of carbon-supported sulphide catalysts, L25
Hydroformylation
ethylene, and CO hydrogenation; *in situ* IR study of, on Ru/SiO_2 and sulphided Ru/SiO_2, 313
and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7

Hydrogen
adsorption structures and mechanisms of hydrogen/deuterium exchange reactions of alcohols over oxidic catalysts, 33
non-empirical calculations for interaction of dihydrogen with hydride and alkyl complexes of B, Al and Ti, 149
reactions of cyclopropane and of ethane with, on Ru/titania catalysts; reaction mechanisms; Ru catalysts, 243
regeneration of NADH and hydrogenation of dihydroxyacetone by, with combination of hydrogenase and glycerol dehydrogenase, L21
Hydrogenase
and glycerol hydrogenase; regeneration of NADH and hydrogenation of dihydroxyacetone by hydrogen with combination of, L21
Hydrogenation
adiponitrile; activity and XRD phase identification of several Ni catalysts for, L17
catalytic transfer-, of unsaturated substrates with formates in presence of water soluble complexes of Rh; chiral sulphonated phosphines, L9
p-chloronitrobenzene; particle size effect on kinetics of, over Pt/alumina catalysts, 331
CO, and ethylene hydroformylation; *in situ* IR study of, on Ru/SiO_2 and sulphided Ru/SiO_2, 313
of dihydroxyacetone and regeneration of NADH by hydrogen with combination of hydrogenase and glycerol dehydrogenase, L21
enantioselective, of α-ketoesters with cinchona-modified Pt catalysts: effect of acidic and basic solvents and additives, 215
Hydroxylation
new ligand for Cu-mediated, of aromatics by trimethylamine *N*-oxide; 2-(*N*-amido)-4-nitrophenol, L13
of phenol over TS-1: surface and solvent effects, 45

n-Icosane cracking
borosilicate synthesis in non-aqueous solvent and its activity for, 301

Iron
catalytic decomposition of N_2O on $LnSrFeO_4$ (Ln = La, Pr, Nd, Sm and Gd), 199
rapid mineralization of organophosphonates by visible light-enhanced peroxidase action of Fe(III) complexes, L35

Ketones
hydroformylation and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7
regeneration of NADH and hydrogenation of dihydroxyacetone by hydrogen with combination of hydrogenase and glycerol dehydrogenase, L21

Lanthanides
catalytic decomposition of N_2O on $LnSrFeO_4$ (Ln = La, Pr, Nd, Sm and Gd), 199
Lysine
L-: Schiff bases of pyridoxal 5′-phosphate and polypeptides containing; kinetic study, 379

Mannose
D-, and D-glucose; kinetics of molybdate-catalysed epimerization of, in aqueous solutions, 87
Metathesis
tungsten carbonyl complexes as olefin, catalysts, 177
Methylosinus trichosporium (OB3b)
NADP-dependent alcohol dehydrogenase in, 255
Mineralization
rapid, of organophosphonates by visible light-enhanced peroxidase action of Fe(III) complexes, L35
Molybdenum
effect of Mo precursor on dispersion and hydrodesulphurization activity of carbon-supported sulphide catalysts, L25
kinetics of molybdate-catalysed epimerization of D-glucose and D-mannose in aqueous solutions, 87

oxygen transfer processes to sulphides and sulphoxides mediated by cetylpyridinium tetrakis(diperoxomolybdo)phosphate, 269

Nickel
activity and XRD phase identification of several Ni catalysts for adiponitrile hydrogenation, L17
-catalysed ring-opening reactions of alkyl-substituted cyclopropanes; role of unreduced Ni species, 237
catalytic dimerization of ethylene to 1-butene by square-planar Ni complexes, 23
charge sensitivities of catalytic clusters: model ($n-$Ni) and (n-Ni)–CO systems, 123
linear dimerization of conjugated dienes: chemo, regio and enantioselective reaction catalysed by Ni complexes, 159
selective head-to-tail dimer formation from acrylonitrile catalysed by phosphine-added Ni(0) complexes, L5
synthesis of acetic acid from methyl formate catalysed by Ni complexes, 277
Nitrile
activity and XRD phase identification of several Ni catalysts for adiponitrile hydrogenation, L17
metal-catalysed reactions of triethyl phosphonoacetate and β-ketophosphonates with electrophilically activated nitriles, L1
selective head-to-tail dimer formation from acrylonitrile catalysed by phosphine-added Ni(0) complexes, L5
Nitrogen fixation
on supported Ti complexes, 371

Olefins: see Alkenes
Oxygen
adsorption of O_2 and NO on CrO_x/ZrO_2 catalysts, as investigated by IR and ESR spectroscopies, 53
oxygen transfer processes to sulphides and sulphoxides mediated by cetylpyridinium tetrakis(diperoxomolybdo)phosphate, 269
quantum chemical interpretation of mechanism of ethanol dehydrogenation driven by active oxygen bridges in silicalite-1 and silica, 73

Palladium
influence of Zr ions on properties of Pd supported on graphite and diamond, 355
Particle size effect
on kinetics of p-chloronitrobenzene hydrogenation over Pt/alumina catalysts, 331
Peroxidase action
visible light-enhanced; rapid mineralization of organophosphonates by, of Fe(III) complexes, L35
Phosphorus
amino acid catalytic effect on transamination reaction between pyridoxal 5′-phosphate and L-serine, 105
chiral sulphonated phosphines: catalytic transfer-hydrogenation of unsaturated substrates with formates in presence of water soluble complexes of Rh, L9
hydroformylation and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7
metal-catalysed reactions of triethyl phosphonoacetate and β-ketophosphonates with electrophilically activated nitriles, L1
oxygen transfer processes to sulphides and sulphoxides mediated by cetylpyridinium tetrakis(diperoxomolybdo)phosphate, 269
rapid mineralization of organophosphonates by visible light-enhanced peroxidase action of Fe(III) complexes, L35
Schiff bases of pyridoxal 5′-phosphate and polypeptides containing L-lysine: kinetic study, 379
selective head-to-tail dimer formation from acrylonitrile catalysed by phosphine-added Ni(0) complexes, L5
Platinum
enantioselective hydrogenation of α-ketoesters with cinchona-modified Pt catalysts: effect of acidic and basic solvents and additives, 215

particle size effect on kinetics of *p*-chloronitrobenzene hydrogenation over Pt/alumina catalysts, 331
Polypeptides
Schiff bases of pyridoxal 5′-phosphate and, containing L-lysine: kinetic study, 379

Quantum chemical interpretation
of mechanism of ethanol dehydrogenation driven by active oxygen bridges in silicalite-1 and silica, 73

Rhodium
chiral sulphonated phosphines: catalytic transfer-hydrogenation of unsaturated substrates with formates in presence of water soluble complexes of Rh, L9
hydroformylation and hydrocarbonylation of dicyclopentadiene with Co–Rh catalytic systems promoted by triphenylphosphine: synthesis of monoformyltricyclodecenes, diformyltricyclodecanes and di(tricyclodecenyl)ketones, 7
Ruthenium
catalysts: reactions of cyclopropane and of ethane with hydrogen on Ru/titania catalysts; reaction mechanisms, 243
homogeneous catalytic carbonylation of nitroaromatics: discovery and *in situ* high pressure FTIR spectral studies of a novel binuclear Ru catalyst, 289
IR study, *in situ*, of ethylene hydroformylation and CO hydrogenation on Ru/SiO_2 and sulphided Ru/SiO_2, 313
kinetic study of [Ru(SALOPH)Cl_2] complex-catalysed oxidative carbonylation of methylamine to give methylurethane, 261

Schiff bases
of pyridoxal 5′-phosphate and polypeptides containing L-lysine: kinetic study, 379
Serine
L-, and pyridoxal 5′-phosphate; amino acid catalytic effect on transamination reaction between, 105
Silicon
IR study, *in situ*, of ethylene hydroformylation and CO hydrogenation on Ru/SiO_2 and sulphided Ru/SiO_2, 313
quantum chemical interpretation of mechanism of ethanol dehydrogenation driven by active oxygen bridges in silicalite-1 and silica, 73
Spectroscopy
adsorption of O_2 and NO on CrO_x/ZrO_2 catalysts, as investigated by IR and ESR spectroscopies, 53
homogeneous catalytic carbonylation of nitroaromatics: discovery and *in situ* high pressure FTIR spectral studies of a novel binuclear Ru catalyst, 289
IR study, *in situ*, of ethylene hydroformylation and CO hydrogenation on Ru/SiO_2 and sulphided Ru/SiO_2, 313
Strontium
catalytic decomposition of N_2O on Ln-$SrFeO_4$ (Ln = La, Pr, Nd, Sm and Gd), 199
Sulphur
chiral sulphonated phosphines: catalytic transfer-hydrogenation of unsaturated substrates with formates in presence of water soluble complexes of Rh, L9
effect of Mo precursor on dispersion and hydrodesulphurization activity of carbon-supported sulphide catalysts, L25
IR study, *in situ*, of ethylene hydroformylation and CO hydrogenation on Ru/SiO_2 and sulphided Ru/SiO_2, 313
oxygen transfer processes to sulphides and sulphoxides mediated by cetylpyridinium tetrakis(diperoxomolybdo)phosphate, 269
Surface
and solvent effects: hydroxylation of phenol over TS-1, 45

Titanium
nitrogen fixation on supported Ti complexes, 371
non-empirical calculations for interaction of dihydrogen with hydride and alkyl complexes of B, Al and Ti, 149
Ru catalysts: reactions of cyclopropane and of ethane with hydrogen on Ru/titania catalysts; reaction mechanisms, 243

Transamination reaction
amino acid catalytic effect on, between pyridoxal 5′-phosphate and L-serine, 105
TS-1
hydroxylation of phenol over: surface and solvent effects, 45
Tungsten carbonyl complexes
as olefin metathesis catalysts, 177

Uranyl ion
action of, on catalytic activity of Y faujasite; catalytic amination of octanol in gaseous phase, 187

Vanadium oxide catalysts
finite supercluster model of, 223
Visible light
-enhanced peroxidase action; rapid mineralization of organophosphonates by, of Fe(III) complexes, L35

Water
chiral sulphonated phosphines: catalytic transfer-hydrogenation of unsaturated substrates with formates in presence of water soluble complexes of Rh, L9

XRD phase identification
and activity of several Ni catalysts for adiponitrile hydrogenation, L17

Y faujasite
action of uranyl ion on catalytic activity of; catalytic amination of octanol in gaseous phase, 187

Zeolites
dehydrogenation of benzyl alcohol on ZSM-5 zeolites, 295
Zirconium
adsorption of O_2 and NO on CrO_x/ZrO_2 catalysts, as investigated by IR and ESR spectroscopies, 53
influence of Zr ions on properties of Pd supported on graphite and diamond, 355
